PROFILE

Results-driven Software Engineer with **2+ years of experience** building scalable, responsive enterprise web and mobile applications. Proficient in **React.js, Next.js, React Native, and Firebase**, with a proven track record spanning **12+ production applications** across HRMS, AI, logistics, compliance, and media domains. Progressed from **Software Engineer Trainee** to **Associate Software Engineer** at **Kryptos Infosys**, demonstrating consistent growth in delivering clean, maintainable **front-end solutions**, **integrating RESTful APIs**, implementing **role-based access control**, and optimizing UI performance. Consistently recognized for code quality, cross-functional collaboration, and on-time delivery.

PROFESSIONAL EXPERIENCE

Krypto's Infosys , **Associate Software Engineer**
June 2025 – present
Chennai, India

- Engineered and maintained 8+ enterprise-grade web applications using React.js, Next.js, Firebase, Ant Design, and Material UI across AI, media, compliance, and cloud service verticals.
- Architected role-based access control (RBAC) systems enforcing secure, permission-driven navigation for 5+ distinct user roles (Super Admin, HR Admin, Manager, Team Lead, Employee) across multiple applications.
- Built a comprehensive multi-format report export engine covering 22+ report types (Excel via ExcelJS, PDF via jsPDF+autoTable, Word) including attendance, statutory, appraisal, and payroll reports.
- Integrated Azure OpenAI and Tavous AI APIs into production applications, enabling conversational AI, automated proposal summarization, and AI-driven candidate screening workflows.

Krypto's Infosys, Software Engineer Trainee
May 2024 – June 2025
Chennai, India

- Developed 10+ functional modules for the Rowgistic Android app including Training Management (Create, Edit, View, Join), Account Deletion, Marketplace, Club, Events, Logging, and Training Calendar (Day/Week/Month views).
- Implemented multi-language localization across the entire Rowgistic app supporting Norwegian, Swedish, Danish, Spanish, German, and French translations for 30+ screens.
- Integrated Firebase Firestore for real-time CRUD operations including training scheduling, membership management, boat marketplace listings, and PDF payment receipt generation.
- Built the SharePoint to Blob Migration Application frontend using React.js and MSAL: user table with Teams-style avatars, multi-file selection, Backup/Migrate/Restore workflows, schedule form, date-range filtering, and report generation.

SKILLS

Language
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- SQL

Framework & Library
- React.js
- Next.js
- React Native
- Material UI
- Ant Design
- Tailwind CSS

Backend & Cloud
- Firebase (Firestore, Authentication, Cloud Functions)
- Azure Blob Storage
- Azure OpenAI
- MSAL

Dev Tools
- Git
- GitHub
- VS Code
- Postman
- Azure DevOps

EDUCATION

Master of Science (M.Sc.) in Information Technology, 2021 – 2023
Arignar Anna Government Arts College Vilupuram, India

PROJECTS

A4A User Management Application, React.js, TypeScript, Material UI, MSAL (Microsoft Entra ID), REST API
- Built the client for a membership platform managing Groups, Contacts and Companies, with global search, a dashboard, audit logs and PDF/Excel reports (Participation, Group Details, Liaison, Chair Counts). It uses server-side pagination, debounced search and an API service layer with a mock-mode fallback.
- Implemented Microsoft Entra ID single sign-on with automatic login redirect, plus a permission-driven UI. This covers read-only modes, admin-only reports and group-type-specific validation such as chair and vice-chair limits and a single primary representative.
- Developed the Microsoft 365 Sync Management admin console. It has pending, failed and successful sync tabs, manual provisioning and deprovisioning, retry actions, and discrepancy dialogs showing error traces and correlation IDs.
- Created a reusable CSV/Excel export component used across 5 modules and a global API error-handling utility. Improved load time with Rollup vendor chunking and React.lazy route splitting. Unit-tested the modules and demoed features to the client in weekly reviews.

InterU.AI, React.js, TypeScript, Tailwind CSS, Daily.co, jsPDF
- End-to-end AI interview platform: HR dashboard, candidate registration, live video sessions (Daily.co), AI analysis with score breakdown, session recording playback, multi-tab security, and AuditLogs.
- Implemented Google Calendar ICS integration, PDF analysis reports (jsPDF + html2canvas), and full responsive design with unit-tested layouts across all screens.

Attendance Management Application, React.js, Ant Design, REST API, ExcelJS, jsPDF
- Full-scale HRMS covering 20+ modules: Attendance, Leave, Shift, Holiday, Employee Profile, Probation, Appraisal, Goals & KRA, Payroll, and Reports — built across both trainee and associate tenures.
- Engineered a 22-type daily report engine with multi-format export (Excel, PDF, Word) and an Appraisal Management system with KRA workflows, Self/Manager Evaluation, and Salary Revision letter generation.
- Implemented role-based access control for 5+ roles, interactive Monthly Calendar with color-coded attendance status, Probation Module with Checklist and Confirmation Letter generation, and session-based token refresh security.

KnowerAI – Multi-Tenant SaaS Dashboard , React.js, Material UI, REST API
- Developed Client, Tenant, User, App, Billing, and Audit Log management with granular RBAC, infinite-scroll dropdowns, billing management with PDF invoice generation, and 30+ components documented inline

Rowgistic – Cross-Platform Logistics App, React Native, Firebase, Xcode, Multi-language

- Developed 10+ modules for Android including Training Management, Marketplace, Club, Events, and Training Calendar (Day/Week/Month) with Firestore real-time integration and PDF payment receipt generation.
- Implemented multi-language localization (6 languages), global stylesheets, skeleton loaders, and error/success modal patterns across 30+ screens; resolved complex iOS build errors enabling simulator deployment.

ACHIEVEMENTS & HIGHLIGHTS

Emerging Talent Award – 2026, Quarterly Rewards & Recognition – 2nd Quarter
September 2026
Chennai, India

Received the Emerging Talent Award during the 2nd Quarterly Rewards & Recognition Ceremony in September 2026. This recognition highlights my technical contributions, commitment to delivering quality solutions, adaptability in learning new technologies, and dedication to supporting project objectives and team success.

DECLARATION

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge. I am committed to maintaining integrity and transparency in all professional matters.
